NBN WITH 4G BACKUP

Aecom Solutions NBN plans deliver a broadband internet service over the NBN network to the network boundary point at your premises. The plans include unlimited uploads and downloads. A preconfigured Wi-Fi modem is included for self-installation. The price of the modem is dependent on the contract term you select. Information about the modem is available at [aecom solutions](#).

Available terms are 24 months.

The service includes an Australian phone number and unlimited local, national and mobile calls, and uncharged calls to 13/1300 numbers.

The 4G Backup service utilises the Telstra mobile network, and 4G coverage is required to use the 4G backup service. You can access the coverage map at <https://www.telstra.com.au/coverage-networks/our-coverage>

The 4G Backup Service Plan can only be used with your Aecom Solutions NBN with 4G backup service. If there is an outage of the NBN service, you will still have access to the internet via the 4G Backup service. Please note that some services may not work in back-up (ie services hosted on-premise when Static IP is in use).

Aecom Solutions 4G backup is not throttled and runs at the available speed. 50GB of data is included within each billing period and renews on the 12th of the month. After the 50GB is exhausted the backup service will stop until the data renewal date on the 12th of the month when the 50GB will be replenished.

If we reasonably believe you are misusing the back-up service, we will contact you. If you continue to misuse the back-up service, we may:

- suspend or limit your 4G Backup Service; and/or
- cancel your 4G Backup Service by telling you at least 7 days beforehand.

Actual throughput speeds may vary due to many factors including type/source of content being downloaded, hardware/software configuration, type of NBN technology, the number of simultaneous users on the network and the performance of interconnecting infrastructure not operated by Aecom Solutions. Devices connected by Wi-Fi may experience slower speeds than those connected by a cable. Important information regarding speeds can be found at [important-documents](#). If your NBN service does not allow you to properly benefit from your speed tier, we will provide you with your maximum line speed, once it is available, along with alternative options. Options may include a price reduction or a release from your contract without penalty.

Maximum EARLY TERMINATION CHARGES

If you cancel a 24-Mth service in months 1-12, the ETP will be: \$350
If you cancel a 24-Mth service in months 13-24, the ETP will be: \$150
